

Casinetto

QUALITY FOOD SELECTION

“

Good food comes from high-quality, artisanal ingredients which is why we hand-pick our suppliers. They are friends and families who are environmentally aware and conscientious of how the food is produced.

Giacomo Bernardelli
FOUNDER

We are different

Casinetto is a home grown business that understands how truly important it is to keep everything natural and simple. Being farmers ourselves, we understand that importance of sustainable farming practices and support businesses that do the same. We source and offer regional produce that have chosen to bypass intensive farming methods, keeping everything truly fresh.

OUR MISSION

Our goal is to provide our customers with aspirational authentically produced food products from hand-picked suppliers in the world who know the importance of sustainable agriculture and fresh local produce.

OUR VALUES

We only carefully source producers that provide 'real food' not that from mass production or intensive farming. We will never compromise on the quality and taste of natural food that has been grown by conscientious farmers and crafted with artisanal methods
